

WE ARE MASS SAVE®:

*The path to
carbon neutral*

Carbon neutrality is
the future, and the
Massachusetts Program
Administrators are all in.

**“The Massachusetts
Program
Administrators
have been key in
driving innovation.”**

VINCENT GRAZIANO, RISE Engineering

TABLE OF CONTENTS

The Massachusetts Program Administrators have been a driving force for greenhouse gas reductions in Massachusetts for the past 10 years, and we're ready to do even more in the next decade.

FOR THE PAST 10 YEARS...

For the past 10 years, we've been the leading force for carbon reduction in Massachusetts. Using our energy efficiency programs,

Massachusetts residents have reduced their carbon dioxide emissions by 3,747,479 metric tons; that's the equivalent of taking 795,650 of cars off the road, which is a third of all cars on the road in Massachusetts in 2018.

Saving energy means saving money, too.

The cheapest fuel is the kind you don't use, and we've generated \$27.4 billion in benefits for Massachusetts residents and businesses.

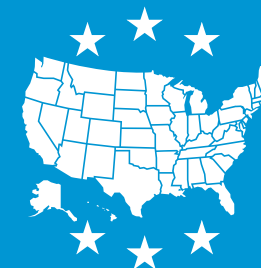

And, we've been the best in the nation in lowering our customers' energy use.

For nine consecutive years, Massachusetts was ranked #1 on the American Council for an Energy-Efficient Economy's (ACEEE) State Energy Efficiency Scorecard. The scorecard benchmarks state progress on efficiency policies and programs that save energy while benefiting the environment and promoting economic growth. Per capita, Massachusetts invests between two and five times more in energy efficiency than California.

Our HEAT Loan program provides interest subsidization on over \$100M of loans per year to provide customers with zero-interest financing for energy-efficient home upgrades, positioning us among the most subscribed energy efficiency loan programs in the nation.

Our track record is the best in the nation; here's what we've done so far, and what we're doing next.

To reach our ambitious goals, we'll need to deliver in two major areas: **helping our customers use less energy**, and making **new, clean energy technologies available to everyone**.

BEST IN THE NATION

DELIVERING GREEN TECHNOLOGY

RAY JACKSON

Director of Physical Plant,
University of Massachusetts,
Amherst

“**INSTRUMENTAL IN HELPING
US OPTIMIZE WHAT WE
HAVE, AND THINK ABOUT
WHAT’S NEXT.**”

Equitably bringing new technology to millions of people is a big challenge.

We’ve spent the last ten years connecting Massachusetts to energy-saving solutions, and no one has done it better.

We’ve weatherized over 250,000 homes, led the way in battery storage technologies, offered hundreds of millions of dollars in incentives for green products, created innovative demand response solutions, pioneered virtual in-home energy assessments, and so much more.

Driving new technology into the market is also a great economic boost.

For every \$1 spent on energy efficiency, the Commonwealth gets back nearly \$4 in benefits. Over the past ten years, that has equaled \$27.4 billion in benefits.

We’ve also employed **approximately 88,000 people in Massachusetts every year**, and we’re working with schools and nonprofits across the state to ensure equitable workforce development,

and help everyone in Massachusetts who wants a career in energy efficiency find one.

Whether it’s heat pumps, or any of the innovative clean energy technologies that are being developed every day, bringing the latest green technology to Massachusetts is going to be key in helping the Commonwealth go carbon neutral, and nobody is better prepared to do that than your Massachusetts Program Administrators.

**FOR EVERY \$1 SPENT ON ENERGY
EFFICIENCY, THE COMMONWEALTH GETS
BACK NEARLY \$4 IN BENEFITS.**

WE CAN'T DO IT WITHOUT YOU, IT'S ALL ABOUT THE CUSTOMERS

Our energy efficiency programs are, first and foremost, an investment in the future of Massachusetts.

OVER
\$200 MILLION **ANNUAL
BILL SAVINGS**
FOR RESIDENTIAL CUSTOMERS IN 2020

EE Programs and Their Benefits

Our best-in-the-nation energy efficiency programs are partially funded by the people of Massachusetts, and they have made a great investment. Working together with program staff, customers, volunteers, legislators, and more, we have been able to create and administer innovative and cost-saving solutions with low administrative costs that deliver value year after

year, and have helped make Massachusetts one of the best places in America to live and own a business.

As we look to the future, energy efficiency is one of the key tools Massachusetts can use to continue to lead and innovate. The Massachusetts Program Administrators, contractors, and regulators are all working together to keep

these programs running, and our solutions have been so successful because of this collaborative approach. We'll need all hands on deck to take on tomorrow's challenges – be it global warming, grid modernization, energy equity and access to new technology, or storm preparation – and together we can build an even more efficient Massachusetts.

EQUITY: PROGRAM ACCESS IN MASSACHUSETTS GATEWAY CITIES*

**Energy efficiency
solutions must
be accessible
to everyone.**

The Massachusetts Program Administrators are committed to serving high-need and distressed communities.

Given the investment needed for participants to implement energy efficiency solutions, we created ways for economically-stressed families and businesses to participate and benefit from the long-term savings that follow these

improvements. From 2013 to 2019, we provided over \$680,000,000 in combined electric and gas incentives in Massachusetts' Gateway Cities (urban economic centers that anchor regional communities), and we're

placing even more emphasis on growing both our savings and outreach strategy for these communities, all to make sure everyone in Massachusetts has access to a bright, clean energy future.

Year	Annual Electric Usage (MWh)	Annual Electric Savings (MWh)	Electric Incentives	Annual Gas Usage (Therms)	Annual Gas Savings (Therms)	Gas Incentives
2013-2019	58,840,665	1,861,462	\$475,582,210	4,592,553,416	43,491,179	\$206,621,429
2019	8,788,888	338,636	\$83,430,601	739,694,315	6,949,701	\$49,892,174

*Includes the following Gateway municipalities based on criteria under Chapter 23A Section 3A: Attleboro, Barnstable, Brockton, Chelsea, Chicopee, Everett, Fall River, Fitchburg, Haverhill, Lawrence, Leominster, Lowell, Lynn, Malden, Methuen, New Bedford, Peabody, Pittsfield, Quincy, Revere, Salem, Springfield, Taunton, and Worcester. Holyoke and Westfield are not served by the Program Administrators.

2020 RESIDENTIAL

Income Eligible: Helping those in need

"For forty years, this pioneering collaboration has been installing a comprehensive suite of measures at large scale yet no cost to low-income householders in every corner of the Commonwealth, with full project management and strict quality control to guarantee results, warmth, safety, and customer satisfaction"

ELLIOTT JACOBSON, ACTION INC AND LEAN CHAIR

29K low income participants	\$79.1M total expenditures	18,000 annual electric savings (MWh)	185,500 annual gas savings (Therms)	\$77.4M total benefits

2020 COMMERCIAL & INDUSTRIAL

Program delivery

"We never thought the project would be affordable, but the program helped us make changes we otherwise wouldn't have been able to do... Everything was done in a way that met our needs without startling the animals or interrupting our business."

CARMINE DICENSO, BIZ DAKIN HUMANE SOCIETY

"The entire process was easy. I was so impressed with the quality of work that I had my three other stores evaluated for energy efficiency upgrades."

ARTHUR TUFFAHA, B.D. FURNITURE

“ TESTIMONIALS

WENDY TODD, DNV

Energy efficiency remains the greatest available resource for a sustainable and equitable energy system,

and as Massachusetts charts a path towards Net Zero emissions by 2050, the Mass Save programs will continue to play a pivotal role in meeting these goals. Further, the global energy transition is moving quickly — key energy efficiency markets are transforming, and program offerings are shifting to support behavioral-based approaches, building decarbonization and active demand management, all while businesses are still recovering from the COVID-19 pandemic and figuring out what their new “normal” looks like.

JOHN WELLS, ACTION FOR BOSTON COMMUNITY DEVELOPMENT AND LEAN CHAIR

The constantly evolving Program Administrator-LEAN partnership has been at the cutting edge from its outset...

The partnership has been a national leader in high-tech, rigorously field-tested, cost-effective, climate-protecting solutions that improve health and reduce energy bills, creating templates now used for single-family homes and large multi-family buildings across Massachusetts and the nation. Massachusetts low-income households have thus been among the first to enjoy the benefits of first class, large scale, award-winning energy innovation.

MICHAEL HOGAN, PARADIGM ENERGY SERVICES

Program Administrators provide vendors like us with consistency and stability to help bring innovative

energy efficiency solutions to market, as well as flexibility to help us tackle challenges that arise along the way. We are excited about the innovations and support that Program Administrators will provide in the coming years, and look forward to continuing to fuel Massachusetts businesses with turnkey energy efficiency solutions that make financial and environmental sense.

VINCENT GRAZIANO, RISE ENGINEERING

Over 300 firms work to deliver small businesses and residential customers specialized energy efficiency solutions

across Massachusetts, helping us provide all customers with the best possible energy-saving services tailored to their needs. Program Administrators have been key in driving innovation and bringing custom technologies to market, and we look forward to continuing to work together and find new ways to meet Massachusetts's evolving energy goals.

MAGDA LELEK, ANDELMAN AND LELEK ENGINEERING

We would like to grow our business so we can better help our clients achieve energy efficiency and sustainability goals.

Having a stable and consistent PA system, that we and our clients are familiar with, supports this goal by offering stability in our potential plans... We find the current PA system to be well structured, strong, and dependable.

KATHLEEN BARRETT, ON THE HEAT LOAN

The people who work for the Mass Save program really help you through the process.

It was absolutely positive throughout the whole thing. To my friends, I say, ‘You need to get this assessment.’

MIDNA RAMOS, ON MASS SAVE'S INCOME ELIGIBLE PROGRAMS

I couldn't say anything better about Mass Save. I couldn't put into words how amazing they've been.

My comfort, bills, the air—everything has improved since I got the work done. The program made my house a home.

GEORGE DOWNIE, ON A HOME ENERGY ASSESSMENT

The contractors did an incredible job. I was really impressed...

For people my age on a fixed income, any way that you can save some money is important—and with the program I've been able to do just that.

RICHARD MCKENNA, ON A HOME ENERGY ASSESSMENT

I thought I knew what I needed to know, but my Energy Specialist taught me things I didn't even know

about my house! A couple hours of your time is all it takes to save a couple hundred bucks or more. It was just so easy.

CHARLES G., CHANCELLOR GARDENS APARTMENT COMPLEX

We're seeing lower heating bills.

Tenants are even telling us that it gets hotter or colder faster in their apartment, depending on the season. I wish everyone knew about this program. It's unbelievable.

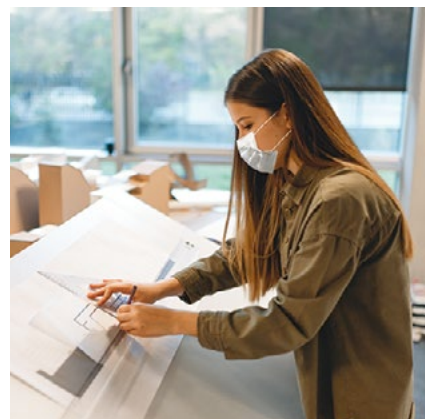

SERVING CUSTOMERS DURING COVID-19

2020 posed several unprecedented challenges, and the Massachusetts Program Administrators responded with the agility and dedication that has continually earned us national recognition. Within days of shifting to working from home, our teams began offering virtual pre-assessments for our customers, and we were the first in the nation to do so. We also rolled out a special product offering, began offering free online training resources to our network of contractors who were affected by the suspension of in-person services, and led the charge to create energy efficiency-specific COVID-19 health and safety guidelines.

To date, more than **4,900 virtual pre-assessments** have been completed, around **1,000 contractors have earned new skills** from the online trainings, and more than **4,400 contractors have been trained on the health and safety guidelines.**

HEALTH AND SAFETY MEASURES
