

**WATER RESOURCES OVERSIGHT COMMITTEE AGENDA
THURSDAY, NOVEMBER 22ND, 2018 AT 4:00PM
TRURO TOWN HALL
24 TOWN HALL ROAD**

1. Discussion of effects of sewerage Beach Point. The Health Department has completed a spreadsheet tabulating the total waste that would be added to the Provincetown sewer system if Beach Point were to become part of that system. That leaves the question of what could happen to building density when Title Five restrictions are removed.
2. Assuming we receive a final report from our Engineers, the question of designating all of Truro as nitrogen sensitive needs to be discussed.
