MEMORANDUM

To: Truro Planning Board

From: Barbara Carboni, Town Planner and Land Use Counsel

Date: October 17, 2022

Re: October 19, 2022 meeting

2022 2022-005/PB - Application (Form A) of Regan McCarthy for Determination that Plan Does Not Require Approval (ANR) under the Subdivision Control Law with respect to property known as 35A Higgins Hollow Road, located partly in the Seashore District and partly in the Residential District.

Update: As the Board will remember, the Applicant agreed to an extension of time for Board action on the ANR plan to allow the Applicant time to meet with the Cape Cod National Seashore regarding her rights under the Boundary Line Agreement and Right of Way permit.

Applicant's counsel has advised that discussions with the National Seashore are ongoing and has requested that the Board further consider the application at its meeting on November 2, 2022. The Applicant has agreed to extend the time for Board action through that date.

2022-010/SPR – Crown Castle/DISH Wireless, on property located at 344 Route 6 (Atlas Map 39, Parcel 172), seeking a special permit¹ under Section 40.5 of the Truro Zoning Bylaw and approval of an Eligible Facilities Request to install certain equipment on the cell tower.

The proposal is to install three antennas, six remote radio units and one “over voltage protection device” at a height of 122 feet on the tower, and three cables, three fiber trunks and one radio cabinet in the existing structure.

The original Structural Evaluation submitted with this application was a single page, which did not include information regarding the Risk Category applied (as there was with the Crown Castle/T-Mobile Structural Analysis Report). In addition, the page was signed by the engineer in July 2021, prior to the revised Structural Analysis recently provided to the Board in conjunction with the T-Mobile application.

The Applicant's representative has requested that the T-Mobile Structural Analysis be added to the record for this (Dish Wireless), application and considered by the Board in its review of the Dish Wireless request. It is possible, but not certain that the Board may use the T-Mobile Structural analysis for this purpose; it is hoped that discussion at the meeting will resolve this question.

¹ The application references Site Plan Review, but the relief required is a special permit. A form briefly available online referenced Site Plan Review, but has since been corrected.

2022-006/PB – Matthew Bramble and Murray Bartlett seek endorsement of an ANR plan with respect to property located at 31 and 33 Sylvan Lane (Atlas Map 43, Parcels 74 and 75)

The Applicant proposes to combine Lot 1 (31 Sylvan Lane, 88,358 square feet) and Lot 8 (33 Sylvan Lane, 31,332 square feet) as shown on the submitted Plan to form Lot 8A (total 119,690 square feet). Both are located in the Residential District; 31 Sylvan is unimproved; 33 Sylvan appears to be improved by a small structure. As requested by the Chair, the Applicant has provided additional information regarding the condition of Sylvan Lane. See email dated October 7, 2022.

The Form A states that an ANR endorsement is warranted where:

“The division of the tract of land shown on the accompanying plan is not a ‘subdivision’ because it shows a proposed conveyance/other instrument, namely [removing an interior lot line and combining into 1 lot] which adds to/takes a way from/changes the size and shape of, lots in such a manner that no lot affected is left without frontage as required by the Truro Zoning Bylaw under Section 50.1(A), which requires 150 feet.”

The resulting single Lot 8A would have over 150 feet of frontage on Sylvan Way, satisfying the above requirement.²

As the Board is aware, an ANR endorsement represents the Board’s finding that what is proposed is not a “subdivision” as that term is defined in G.L. c. 41. A combination of lots, as proposed here, is one appropriate use of the ANR procedure (subject to the frontage requirement above). There would not appear to be any obstacles to endorsement of the Plan as Approval Not Required.

² A note on the Plan appropriately notes that the Planning Board’s endorsement does not indicate that the lot is buildable or that it meets zoning, health, or general bylaw requirements.

Hi Liz and Barbara,

Let's go with November 2nd. That gives us more time to work with the Seashore and submit documents one week ahead.

Let me know if that works.

Thanks.

Per your email to Atty Senie today, I am sending two access ways to a video which we tried to screen share this at the Sept 21 meeting and ran into technical difficulties. We promised to make this accessible to the Planning Board. It will be important for the PB to see this. It is too large a file for the Town's email to accept, and I can bring a copy over for downloading to the Town's iCloud if you want. Alternately, this can be accessed by the PB either by:

1. Send the link [below] to PB members, which will remain available through Oct 21, to this video for viewing and/or downloading.
2. Give the link to the Truro Organizer to show at the October 12th meeting.

FORM A

APPLICATION FOR DETERMINATION THAT PLAN DOES NOT REQUIRE APPROVAL (ANR)

To the Planning Board of the Town of Truro, MA

Date SEPTEMBER 30, 2022

The undersigned owners of all the land described herein submitted the accompanying plan entitled:

PLAN OF LAND IN TRURO, AS SUBDIVIDED FOR
MATTHEW D. DEAMBLE & MURRAY J. BARRETT and dated AUGUST 8, 2022, requests a determination and endorsement by said Board that approval by it under the Subdivision Control Law is not required.

Property Location: 31 & 33 SYLVAN LAKE Map(s) and Parcel(s): MAP 43 PARCELS 74 & 75

Number of Lots Created: ONE Total Land Area: 119,690 ± sq. ft.,
2.748 ± acres

The owner's title to said land is derived under deed from © JULIANNE BRITT
© SUSAN H. ARESON, dated JUNE 14, 2022 and recorded in the Barnstable Registry of Deeds Book and Page 35191 / 48
33385 / 120 or Land Court Certificate of Title No. N.A. registered in Barnstable County.

The undersigned believes that such approval is not required for the following reasons: (check as appropriate)

- ☐ The accompanying plan is not a subdivision because the plan does not show a division of land.
- ☐ The division of the tract of land shown on the accompanying plan is not a subdivision because every lot shown on the plan has frontage of at least such distance as is presently required by the Truro Zoning Bylaw under Section 50.1(A) which requires 150 feet for erection of a building on such lot; and every lot shown on the plan has such frontage on:
- ☐ a public way or way which the Town Clerk certifies is maintained and used as a public way, namely _____, or
- ☐ a way shown on a plan theretofore approved and endorsed in accordance with the subdivision control law, namely _____ on _____ and subject to the following conditions _____; or
- ☐ a private way in existence on December 8, 1955, the date when the subdivision control law became effective in the Town of Truro having, in the opinion of the Planning Board, sufficient width, suitable grades, and adequate construction to provide for the needs of vehicular traffic in relation to the proposed use of the land abutting thereon or served thereby, and for the installation of municipal services to serve such land and the buildings erected or to be erected thereon, namely _____.
- ☒ The division of the tract of land shown on the accompanying plan is not a "subdivision" because it shows a proposed conveyance/other instrument, namely REMOVING AND INITIATING LOT
LINE AND COMBINING INTO LOT which adds to/takes away from/changes the size and shape of, lots in such a manner that no lot affected is left without frontage as required by the Truro Zoning Bylaw under Section 50.1(A), which requires 150 feet.

- ☐ The division of the tract of land shown on the accompanying plan is not a subdivision because two or more buildings, specifically _____ buildings were standing on the property prior to December 8, 1955, the date when the subdivision control law went into effect in the Town of Truro and one of such buildings remains standing on each of the lots/said buildings as shown and located on the accompanying plan. Evidence of the existence of such buildings prior to the effective date of the subdivision control law as follows:

- ☐ Other reasons or comments: (See M.G. L., c.41, §81-L)

All other information as required in the Rules and Regulations Governing Subdivisions of Land shall be submitted as part of the application.

Re: Sylvan Lane
Truro, Massachusetts

Dear Ms. Greenbaum:

Pursuant to your recent request regarding the Status of Condition of the Travelled Surface on Sylvan Lane, I have performed a visual inspection this date and am presenting my findings forthwith:

Please be advised of the following:

1. The "Sylvia Epstein" Subdivision Plan was Approved by the Truro Planning Board on May 24, 1966.
2. The existing Traveled Surface is Pavement in front of 33 Sylvan Lane.
3. Sylvan Lane is a long Subdivision Road. It exists of a dense graded crushed stone / gravel & hardening surface from entrance at Whitmanville Road to our Locus.
4. There did not appear to be any Drainage Structures in-place.

If I can be of any further assistance to you on this matter, please do not hesitate to contact me.

Respectfully submitted,

William N. Rogers II, PE, PLS

Dear Ms. Carboni

Attached is an application for Site Plan Review, for a new wireless collocation on an existing Crown Castle owned lattice tower located at 344 Route 6, Truro.

DISH officially entered the wireless retail space on July 1, 2020. Today, DISH Wireless is the fourth-largest wireless carrier in the United States with 8.9 million subscribers. DISH provides wireless voice and data services in the United States under the Boost Mobile brand and will provide services under its own brand after its network is built. This Application brought forth pertains to DISH's network build.

This collocation of new Transmission Equipment is for a Wireless Communications Facility ("Facility") located at the Site. The installation consists primarily of the following: adding three (3) antennas, six (6) remote radio units, and one (1) over voltage protection device at the 122' centerline height on the tower, three (3) DC power cables, three (3) fiber trunks and one (1) radio cabinet in the existing fenced compound, as depicted in the attached stamped plans.

Please feel free to contact me with any questions, and I look forward to working with you.

Sincerely,

*****NOTICE OF ELIGIBLE FACILITIES REQUEST*****

RE: Request for Minor Modification to Existing Wireless Facility – Section 6409
Site Address: 344 Route 6, Truro, MA
Crown Site ID#841273; DISH Site ID# BOSOS00592A

Planning Board:

On behalf of DISH Wireless L.L.C. ("Dish Wireless" or "Applicant"), Crown Castle USA Inc. ("Crown Castle") is pleased to submit this request to modify the existing wireless facility noted above through the collocation, replacement and/or removal of the Applicant's equipment as an eligible facilities request for a minor modification under Section 6409¹ and the rules of the Federal Communications Commission ("FCC").²

Section 6409 mandates that state and local governments must approve any eligible facilities request for the modification of an existing wireless tower or base station that does not substantially change the physical dimensions of such tower or base station. Under Section 6409, to toll the review period, if the reviewing authority determines that the application is incomplete, it must provide written notice to the applicant within 30 days, which clearly and specifically delineates all missing documents or information reasonably related to whether the request meets the federal requirements.³ Additionally, if a state or local government, fails to issue any approvals required for this request within 60 days, these approvals are deemed granted. The FCC has clarified that the 30-day and 60-day deadlines begins when an applicant: (1) takes the first step required under state or local law; and (2) submits information sufficient to inform the jurisdiction that this modification qualifies under the federal law⁴. Please note that with the submission of this letter and enclosed items, the thirty and sixty-day review periods have started. Based on this filing, the deadline for written notice of incomplete application is November 2nd, 2022, and the deadline for issuance of approval is December 2nd, 2022.

The proposed scope of work for this project includes:

Collocation of antennas, ancillary equipment and ground equipment as per plans for a new carrier on an existing wireless communication facility.

- (1) Application for Special Use Permit;
- (2) Construction Drawings;
- (3) Structural Analysis; and
- (4) Section 6409 Substantial Change Checklist.

As these documents indicate, (i) the modification involves the collocation, removal or replacement of transmission equipment; and (ii) such modification will not substantially change the physical dimensions of such tower or base station. As such, it is an “eligible facilities request” as defined in the FCC’s rules to which the 60-day deadline for approval applies. Accordingly, Applicant requests all authorization necessary for this proposed minor modification under Section 6409.

Our goal is to work with you to obtain approvals earlier than the deadline. We will respond promptly to any request for related information you may have in connection with this request. Please let us know how we can work with you to expedite the approval process. We look forward to working with you on this important project, which will improve wireless telecommunication services in your community using collocation on existing infrastructure. If you have any questions, please do not hesitate to contact me.

Section 6409 Substantial Change Checklist
Towers Outside of the Public Right of Way

The Federal Communications Commission has determined that a modification substantially changes the physical dimension of a wireless tower or base station under 47 U.S.C. § 1455(a) if it meets one of six enumerated criteria under 47 C.F.R. § 1.6100.

Criteria for Towers Outside the Public Rights of Way

YES/NO NO	Does the modification increase the height of the tower by more than the greater of: (a) 10% (b) or, the height of an additional antenna array plus separation of up to 20 feet from the top of the nearest existing antenna?
YES/NO NO	Does the modification add an appurtenance to the body of the tower that would protrude from the edge of the tower more than 20 feet or more than the width of the tower structure at the level of the appurtenance, whichever is greater?
YES/NO NO	Does the modification involve the installation of more than the standard number of new equipment cabinets for the technology involved or add more than four new equipment cabinets?
YES/NO NO	Does the modification entail any excavation or deployment outside the current site by more than 30 feet in any direction, not including any access or utility easements?
YES/NO NO	Does the modification defeat the concealment elements of the eligible support structure?
YES/NO NO	Does the modification violate conditions associated with the siting approval with the prior approval the tower or base station other than as specified in 47 C.F.R. § 1.6100(c)(7)(i) – (iv)?

If all questions in the above section are answered “NO,” then the modification does not constitute a substantial change to the existing tower under 47 C.F.R. § 1.6100.

Crown Castle is pleased to submit this “**Structural Evaluation**” to determine the structural integrity of the above-mentioned tower. The purpose of this evaluation is to determine the suitability of the tower structure to support the proposed equipment configuration listed in Table 1.

Based on a comparison of loading listed in the previous analysis dated 3/27/2019, the proposed loading change will not have a significant impact on the overall tower stress rating. Therefore, the final proposed equipment configuration listed in Table 1 is structurally **ACCEPTABLE**.

Hi Elizabeth,

Thank you for reaching out about this! Yes, Tim Greene and I discussed the structural analysis which was run as risk 3. I reviewed the report and it includes the proposed DISH equipment, so I would like to use this report as part of DISH's application packet.

Thank you very much, and feel free to reach out with any questions.

3.1) Analysis Method

tnxTower (version 8.1.1.0), a commercially available analysis software package, was used to create a three-dimensional model of the tower and calculate member stresses for various loading cases. Selected output from the analysis is included in Appendix A. When applicable, Crown Castle has calculated and provided the effective area for panel antennas using approved methods following the intent of the TIA-222 standard.

3.2) Assumptions

- 1) The tower and structures were maintained in accordance with the - TIA-222 standard.
- 2) The configuration of antennas, transmission cables, mounts and other appurtenances are as specified in Tables 1 and 2 and the referenced drawings.

This analysis may be affected if any assumptions are not valid or have been made in error. B+T Group should be notified to determine the effect on the structural integrity of the tower.

Tower Input Data

The main tower is a 3x free standing tower with an overall height of 170' above the ground line.

The base of the tower is set at an elevation of 0' above the ground line.

The face width of the tower is 8' at the top and 25' at the base.

This tower is designed using the TIA-222-H standard.

The following design criteria apply:

Tower is located in Barnstable County, Massachusetts.

Tower base elevation above sea level: 107'.

Basic wind speed of 149 mph.

Risk Category III.

Exposure Category C.

Simplified Topographic Factor Procedure for wind speed-up calculations is used.

Topographic Category: 1.

Crest Height: 0'.

Nominal ice thickness of 1.500 in.

Ice thickness is considered to increase with height.

Ice density of 56.000 pcf.

A wind speed of 50 mph is used in combination with ice.

Temperature drop of 50.000 °F.

Deflections calculated using a wind speed of 60 mph.

TIA-222-H Annex S.

Pressures are calculated at each section.

Stress ratio used in tower member design is 1.

Tower analysis based on target reliabilities in accordance with Annex S.

Load Modification Factors used: $K_{es}(F_w) = 1.0$, $K_{es}(t_i) = 1.0$.

Maximum demand-capacity ratio is: 1.05.

Local bending stresses due to climbing loads, feed line supports, and appurtenance mounts are not considered.

Ice thicknesses on structures in exposed locations at elevations higher than the surrounding terrain and in valleys and gorges may exceed the mapped values.

Values provided are equivalent radial ice thicknesses due to freezing rain with concurrent 3-second gust speeds, for a 50-year mean recurrence interval, and temperatures concurrent with ice thicknesses due to freezing rain. Thicknesses for ice accretions caused by other sources shall be obtained from local meteorological studies. Ice thicknesses in exposed locations at elevations higher than the surrounding terrain and in valleys and gorges may exceed the mapped values.

FROM SELECT BOARD POLICY 13 – APPOINTMENT POLICY

The same questions, listed below, will be asked of all applicants, though Select Board members may have follow-up questions of some applicants, based upon responses in their written applications or their interviews. Applicants will receive the questions in advance of being interviewed.

QUESTIONS: For all applicants:

1. Please tell us about yourself and why you are interested in joining the _____ board, committee, commission.
2. Are there any specific skills that you would bring to the workings of this group?
3. Tell us about any experience you have had working in a group setting.
4. Do you have a sense of the time required to serve and are you able to make that commitment?

For regulatory and adjudicatory boards, committees, commissions:

1. Have you reviewed the relevant local/state laws and regulations that govern this board, committee, commission?
2. Are you able to make decisions based on the information presented in a case and applicable laws/regulations, regardless of personal opinion?

TOWN OF TRURO

P.O. Box 2030, Truro MA 02666

Tel: (508) 349-7004 Fax: (508) 349-5505

POLICY MEMORANDUM #13

Date: Adopted March 3, 2004; Revised December 5, 2017, revised September 13, 2022; rev September 27, 2022

*This policy was revised at the September 13, 2022 Select Board meeting solely to reflect the titles used in the Town Charter for the Town Manager and Select Board and to modify language to be gender neutral. No changes were made to the content of the Policy at that meeting.

PURPOSE: The Select Board welcomes a diversity of membership on all of its appointed multi-member boards, committees and commissions. This policy provides general information about serving on a town body and aims to ensure consistency and fairness in the Select Board's appointments.

There are four types of boards to which the Select Board makes appointments:

- **Advisory**, which are given a charge by the Select Board and make recommendations.
- **Ad hoc**, which are appointed for a specific purpose for a specific period of time to complete a task.
- **Regulatory**, which are governed by both Massachusetts General Law and local regulations.
- **Adjudicatory**, which are governed by both Massachusetts General Law and local regulations, and consider individual cases brought before it.

At times, the Select Board will make appointments to fill a vacancy on an elected board. The interviews and appointments are made jointly with the members of the board on which the vacancy occurs.

Only full-time Truro residents/voters may be considered for appointment to regulatory boards. The Select Board may consider non-resident taxpayers for appointments to non-regulatory boards. The Select Board has sole discretion to make appointments as it considers to be in the best interests of the town.

PROCEDURES: When a vacancy occurs on an appointed board, committee or commission – due to resignation or expiration of a member's term – the Select Board shall advertise the position(s), including these details:

- The name of the board, committee, commission and name of its current chair
- The term(s) of the vacancy/vacancies
- The typical meeting schedule
- How to obtain an application form
- When online/written applications are due

All applicants for boards, committees and commissions shall fill out a written application to serve, either online or on paper. Board, committee and commission members who are seeking reappointment must also reapply, answering the relevant questions based upon their service. New applicants seeking to serve will be given the same consideration as members seeking reappointment. Applicants for vacancies will be interviewed as soon as they can be accommodated on the Select Board's agenda. If there are multiple candidates for a position (or positions), all applicants will be interviewed at the same meeting. If that is not possible, the Select Board will wait until all applicants have been interviewed before making the appointment(s).

The same questions, listed below, will be asked of all applicants, though Select Board members may have follow-up questions of some applicants, based upon responses in their written applications or their interviews. Applicants will receive the questions in advance of being interviewed.

As part of the application process, board, committee, commission chairs will be asked to comment on each applicant, whether a new candidate or a member seeking reappointment.

The Select Board will use the following protocols in interviewing applicants:

- Questions will be related to the board, committee or commission on which the applicant wants to serve.
- Questions asked of applicants for regulatory and adjudicatory bodies will avoid seeking opinions on matters that are governed by local or state regulations or opinions on matters that are likely to come before the board.
- Comments from the board, committee or commission chair will be considered – either submitted in writing with the application or live during the interview process.

After all applicants have been interviewed, prior to any nominations, all members of the Select Board will have the opportunity to express their preferences for filling the position(s). Nominations for the position(s) will be taken and voted upon after all Select Board discussion.

If the Select Board chooses to leave a position vacant, the applicant(s) will be given an explanation. The Select Board will write letters of thanks to all members of boards, committees and commissions who finish their service, either through resignation or at the end of their terms.

QUESTIONS:

For all applicants:

1. Please tell us about yourself and why you are interested in joining the ____ board, committee, commission.
2. Are there any specific skills that you would bring to the workings of this group?
3. Tell us about any experience you have had working in a group setting.
4. Do you have a sense of the time required to serve and are you able to make that commitment?

For regulatory and adjudicatory boards, committees, commissions:

1. Have you reviewed the relevant local/state laws and regulations that govern this board, committee, commission?
2. Are you able to make decisions based on the information presented in a case and applicable laws/regulations, regardless of personal opinion?

For advisory boards, committees, commissions:

1. Have you followed the work of this group?

2. Are there any ideas or projects you would suggest or pursue as a new member?

OATH OF OFFICE: Written notification of appointment is issued to newly appointed board members, who must report to the Town Clerk's office to be sworn in. Elected and appointed officials must sign an acknowledgement of receipt of information on the state's Open Meeting Law. They also must complete state-mandated online ethics/conflict-of-interest training, required every two years. Members of all boards will be given the Truro Boards, Committees and Commissions Handbook. Newly appointed members are expected to familiarize themselves with the charge and the workings of the board to which they are appointed. They must also adhere to protocols in seeking any assistance from town staff.

TERM OF OFFICE: The full term of office for most positions on appointed boards, committees and commissions is three years, ending on June 30 of the third year. Terms are staggered to assure continuity as new members are elected or appointed.

RESIGNATION: If a board member can no longer fulfill the duties of office, the member must submit a written resignation, including the effective date, to the appointing authority, with a copy to the board chairperson and the Town Clerk. The Select Board encourages board members who resign to specify their reasons, if other than personal. This may be done through an exit interview with the board chair or the Select Board liaison

ATTENDANCE: If a member or alternate member of an appointed board is absent for four consecutive meetings without approval by the rest of the board, the chair will alert the appointing authority and that member will be replaced.

RECALL / REMOVAL: Members of appointed boards may be removed by the appointing authority if they are found to violate professional codes of conduct. The town charter provides that any appointed board member may be suspended or removed from office for good cause. These include: incapacity other than temporary illness; inefficiency and/or inability to perform assigned tasks; insubordination and/or refusal to carry out lawful instructions; or conduct unbecoming to the office and/or which reflects adversely upon the town.

Board Action/Review

2022-005/PB - Regan McCarthy seeks approval of Form A- Application for Determination that Plan Does Not Require Approval (ANR) pursuant to Section 2.2 of the Town of Truro Rules and Regulations Governing the Subdivision of Land with respect to property at 35A Higgins Hollow Road, Truro MA, Atlas Map 47, Parcel 2, Registry of Deeds title reference: Book 20807, Page 42.

Vice Chair Roberts announced that the Applicant requested a continuance until the Planning Board meeting on September 21, 2022. Town Planner/Land Use Counsel Carboni confirmed the request and stated that no vote was necessary to grant the continuance.

2022-009/SPR - Crown Castle, on property located at 344 Route 6 (Atlas Map 39, Parcel 172). Applicant seeks a Special Permit under Section 40.5 of the Truro Zoning Bylaw, and as an Eligible Facilities Request

for a minor modification under Section 64091 and the rules of the Federal Communications Commission ("FCC"), to modify an existing tower: remove or replace antennas, ancillary equipment, and ground equipment as per plans for an existing carrier on an existing wireless communication facility; and replace equipment on existing concrete pad. Such modification will not substantially change the physical dimensions of such tower or base station. The modification does not constitute a substantial change to the existing tower under 47 C.F.R. §1.6100.

Vice Chair Roberts recognized Mr. Greene who provided a summary to the changes which were proposed. Due to the merger between T-Mobile and Sprint, there will be a consolidation of equipment that will result in less equipment on the site. Vice Chair Roberts and Members discussed the following questions and concerns with Mr. Greene:

There is an issue of sparse cellular coverage for emergency service calls in Truro, particularly from the beaches, so are the services provided by the tower redundant? Mr. Greene responded that it is not redundant.

Does the tower have any antennas for emergency services? Mr. Greene was unsure if any antenna was specifically designated for public safety, but he said that it could be added.

What is the fall zone for this tower as it is adjacent to the Public Safety Facility? Mr. Greene responded that the tower is rated for a wind speed up to 139 miles per hour and has been on location for nearly twenty years without issue. Mr. Greene didn't identify a specific fall radius but emphasized that the wind speed ratings for the tower have been significantly increased over the last twenty years and the tower is compliant with today's standards. The risk factor category for the tower is 2.

Vice Chair Roberts noted that the risk factor category for the tower is 2 but expressed concern that the Applicant's engineer, located in Oklahoma, who performed the study may not know that the tower is in such proximity to the Public Safety Facility as it is not indicated on the Site Plan.

Is it possible to install repeaters to ensure better coverage in emergency situations? Mr. Greene replied that he does not represent the carrier but Crown Castle.

Vice Chair Roberts asked Mr. Greene to resubmit an analysis addressing those antennas at 122' can be removed unless they are placeholders to be used in the future and increase the risk factor category to 3. Mr. Greene agreed to provide this information by the next meeting on September 21st.

Development of Warrant Articles

Vice Chair Roberts recognized Member Kiernan who said that he is compiling an email list to use for outreach as there are 150 different people who sit on various boards/committees/commissions in Truro. A challenge has been that individuals who serve on regulatory boards have Town email addresses and others use either business or personal email addresses. Once the list is compiled, with assistance from Town Hall staff, Member Kiernan will contact those individuals for input on changes for Warrant Articles.

Minutes

Vice Chair Roberts, after consulting with Town Planner/Land Use Counsel Carboni, deferred the approval of the Minutes on tonight's Agenda until the next Planning Board meeting as only two Members from those meetings were present tonight.

Vice Chair Roberts announced that the next Planning Board meeting will be on Wednesday, September 21, 2022, at 5pm.

Member Riemer made a motion to adjourn the meeting at 5:49 pm.

Member Kiernan seconded the motion.

So voted, 4-0, motion carries.

Respectfully submitted,
