FOR IMMEDIATE RELEASE

Information from:

Provincetown, Truro, and Wellfleet Health Departments

(June 14, 2022 – Truro, MA) – The Provincetown, Truro, and Wellfleet Health Departments are launching an online COVID At Home Test reporting tool to help the Outer Cape Health Departments better understand how many people have tested positive for COVID-19 using an antigen test to learn how the virus is spreading in our communities. Results are confidential and anonymous and will only be used by Health Department staff for public health surveillance efforts.

If you currently reside or have been in Provincetown, Truro, or Wellfleet during the past 14 days and **have tested positive for COVID-19** using a home test kit (e.g., BinaxNOW, iHealth, QuickVue), please submit the following [online form](#). The link can also be accessed on the [Provincetown](#), [Truro](#), and [Wellfleet](#) Health Department websites.

To avoid duplication of test results, please do not report results of PCR testing that you have completed at healthcare or testing sites.

The online reporting form can be accessed [HERE](#).

For any questions, please contact:

Hillary Greenberg, Wellfleet Health and Conservation Agent

220 West Main Street
Wellfleet, MA 02667
508-349-0308
