PRESS RELEASE

FOR IMMEDIATE RELEASE: July 29, 2021

The Massachusetts Department of Public Health continues to recommend that anyone associated with the Provincetown COVID-19 Case Cluster be tested, regardless of their vaccination status.

Free testing is available at the Veterans Memorial Community Center at 2 Mayflower Street in Provincetown, daily from 10-3. Testing and vaccinations are also available through all branch offices of Outer Cape Health Services.

Effective July 28, Truro businesses may receive free ABBOTT Binax NOW antigen test kits directly from the Health Department in order to test their staff. We ask that business owners send us an email or call the office to take advantage of this opportunity to ensure our community workforce is healthy and to increase the safety of our residents and visitors.

The Truro Health Department will continue to keep the public advised of further developments regarding COVID-19.
