ADDRESSING THE REVIEW CRITERIA

§ 70.1 PURPOSE

The purpose of Site Plan Review for Commercial Development and for Residential Development is to protect the health, safety, convenience and general welfare of the inhabitants of the Town. It provides for a review of plans for uses and structures which may have significant impacts, both within the site and in relation to adjacent properties and streets; including the potential impact on public services and infrastructure; pedestrian and vehicular traffic; significant environmental and historic resources; abutting properties; and community character and ambiance.

Instructions: Please provide the Planning Board with a short explanation of how your application meets each of the review criteria of §70.3F of the Truro Zoning Bylaw. If you require extra space for your answers, please attach the additional information to your application in no more than two pages. This is to provide the Planning Board with an overview of your rationale prior to the meeting.

§70.3F – REVIEW CRITERIA/DESIGN GUIDELINES

The Planning Board will review applications and their supporting information based on the following:

1. The proposal is in conformity with all applicable provisions of the Zoning Bylaw because:

2. The proposal provides for the protection of abutting properties and the surrounding area from detrimental site characteristics and from adverse impact from excessive noise, dust, smoke, or vibration higher than levels previously experienced from permitted uses because:

3. The proposal provides for the protection of adjacent properties and the night sky from intrusive lighting, including parking lot and building exterior lighting. Lighting must be consistent with Chapter IV, Section 6 of the General Bylaws of the Town of Truro because:

4. The proposal provides for the protection of significant or important natural, historic, or scenic features because:

5. The building sites shall minimize obstruction of scenic views from publicly accessible locations; minimize tree, vegetation, and soil removal and grade changes; and maximize open space retention because:

6. The proposal adequately provides for refuse disposal because:

7. The proposed sewage disposal and water supply systems within and adjacent to the site shall be adequate to serve the proposed use because:

8. The proposed drainage system within the site shall be adequate to handle the runoff resulting from the development. Drainage run-off from the project shall not: damage any existing wellfield(s) or public water supply; damage adjoining property; overload, silt up or contaminate any marsh, swamp, bog, pond, stream, or other body of water; or interfere with the functioning of any vernal pool because:

9. A soil erosion plan shall adequately protect all steep slopes within the site and control runoff to adjacent properties and streets both during and after construction because:

10. The proposal shall provide for structural and/or landscaped screening or buffers for storage areas, loading docks, dumpsters, rooftop or other exposed equipment, parking areas, utility buildings and similar features viewed from street frontages and residentially used or zoned premises because:

11. Buildings and structures within the subject site shall relate harmoniously to each other in architectural style, site location, and building exits and entrances. Building scale, massing, materials, and detailing should be compatible with the surrounding area because:

12. Electric, telephone, cable, and other such utility lines and equipment shall be placed underground because:

13. The project shall not place excessive demands on Town services because:

14. The location and number of curb cuts shall be minimized to reduce turning movements and hazardous exits and entrances. Where appropriate and allowable, access to adjoining properties shall be provided. Joint access driveways between adjoining properties shall be encouraged because:

15. Convenience and safety of vehicular and pedestrian movement within the site and in relation to adjacent and other ways serving the project shall be maximized. Traffic patterns for vehicles and pedestrians must show safe and adequate circulation within and access to and from the site because:

16. A bicycle rack(s) shall be provided on the site and shall be located near the entrance to the building(s) because:
